

LIST OF CORRECTIONS

This publication has been prepared primarily by assembling and binding the maps and tabular materials originally issued in the separate PC(1)-A, B, C, and D final reports for the State. This plan was adopted in order to conserve public funds. The corrections listed below represent changes which would ordinarily have been made if this publication had been prepared by reprinting these maps and tabular materials. Those items with an asterisk (\*) consist of

errors which affect not only the specific figure(s) mentioned but also affect other data in this publication. Among the other data which might be involved are the statistics for a larger area of which the particular area is part and the statistics by such classifications as urban-rural residence and size of place. The user can, of course, carry through these types of changes if he thinks them worthwhile.

Chapters A, B, C, and D\*  
The 1960 Census tabulations for Mobile city include an area annexed to the city prior to April 1, 1960, which annexation was later voided by the courts. The 1960 Census population count for this area is 7,923. Thus, the population count for Mobile city should be reduced from 202,779 to 194,856. This area is outside the Mobile Urbanized Area but inside the Mobile SMSA. Certain corrections resulting from this change are listed below; in general, data to revise the statistics on characteristics have not been tabulated.

Pages 10, 13, 16, 17, and 18, tables 5, 7, 8, 9, 10, 11, and 12  
Mobile: Change 1960 population from 202,779 to 194,856.

Pages 12 and 16, tables 7 and 8  
Govington County: Change 1960 population of Red Level town, Red Level division, from 327 to 617. The revised figure includes a number of persons living inside the area who, in the original tabulations, were erroneously counted as living outside the area.  
DeKalb County: Change 1960 population of Rainsville town, Rainsville-Sylvania division, from 398 to 568. The revised figure includes a number of persons living inside the area who, in the original tabulations, were erroneously counted as living outside the area.

The error in table 57 described above also affected the data in table 58, but the amount of the correction for white and nonwhite could not be determined.

For "Construction craftsmen," under "Number, 1960," change 46,120 to 45,961; and under "Percent increase, 1950 to 1960," change 14.4 to 14.0. For "Other craftsmen," change number from 23,144 to 23,303, percent distribution from 3.2 to 3.3, and percent increase from 10.2 to 10.9.

The stub line "Husband-wife families, one earner, two children under 18 years" should read "Husband-wife families, head an earner, two children under 18."

Page 249, table C-2  
The nonresponse rates for "Birth date, decade unknown" erroneously exclude nonresponses for group quarters members other than inmates.

Delete "Note" at end of tables. Nonresponse allocation rates for family income are somewhat overstated; for a detailed discussion, see text, p. XLII.

Pages 379-411, tables 122 to 124  
On each page showing Male, Operatives and kindred workers, the line reading "Furnacemen, smeltermen, and heaters" should be changed to "Furnacemen, smeltermen, and pourers."

Pages 379-429, tables 122 to 125  
On each page showing Male, Craftsmen, foremen, and kindred workers, the line reading "Cranemen, hoistmen, and const. mach. operators" should be changed to "Cranemen, derrickmen, and hoistmen."

Page 456, table 131\*

During the tabulation of statistics on place of work, it was discovered that some enumerators working in unincorporated areas near large cities had failed to identify correctly these large cities as places of work (see text, p. XXXVI). In the tabulations for chapter C, a corrective mechanical edit was introduced that allocated such cases to the largest city in the same county. In some few instances, notably Armed Forces installations, the initial entries were correct, and appreciable numbers of persons living in the ring were incorrectly assigned the central city as a place of work by the edit.

Since many of these persons had reported themselves as working at home, the previous edit was expanded in the tabulations for chapter D to assign these latter cases, as well as other inconsistencies of the same type, to means of transportation not reported.

Page 456, table 131--Con.

The amount then by which the chapter D figure exceeds the chapter C figure for the "Not reported" category in means of transportation for persons living in the SMSA ring provides a rough measure of the amount of the error involved; that is, the amount by which the total figure in column 8 should be decreased and the total figure in column 9 increased. This number was 1,651 for the Huntsville SMSA. In the remaining SMSAs in this State, the effects of the error, if it existed, were very slight. Detailed information on the characteristics of the misclassified persons is not available, but most of them were young men in the Armed Forces.

Page 490, table D-1

The following explanatory footnote should be keyed to the line for "Not reported" in the section on "Relationship":

Limited to persons who were allocated to the categories "Wife of head," "Other relative of head," or "Nonrelative of head."

Page 490, table D-1

The category "Not reported in decade or year" under "Age" erroneously excludes non-responses on decade of birth for group quarters members other than inmates.
